

## **CHAPTER III**

### **RESEARCH METODOLOGY**

#### **3.1 Research Methods**

The approach of this research is a descriptive qualitative research, because there is no treatment and it just analyses the words without using number to support the analysis. Relating to this, Lofland in Moleong (1984:47) , “The main source of a qualitative study are words and actions “.

#### **3.2 Research Data**

The main data of this research are Javanese proper names, and the additional data are six books and some sources from internet which are related to problems.

#### **3.3 The Procedure of The Data Collection**

##### **3.3.1 Data Collection Techniques**

First of all the writer found some theories about illocutionary in speech act especially in linguistics that is to know about the meaning in Javanese names. Not only that but also the writer tried to find the other theories to support the main theory.

Furthermore the writer did the survey for some Javanese to know more about the meaning in their Javanese names. During the survey the writer took the note for the data in the research.

### **3.3.2 Data Analysis**

The procedure of the data analysis are:

- 3.3.2.1. Classify the illocutionary act of Javanese proper name using speech act theory from Searle
- 3.3.2.2 Analyze the intended meaning of Javanese proper name.
- 3.3.2.3 Find out the reasons why the Javanese people has intended meaning or illocutionary act in naming their children
- 3.3.2.3 Make conclusions based on the results of analysis.
