

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

#### **5.1 Conclusion**

Through the analyzing and finding from the chapter above, this research had answered as stated in the statements of the problems. From the data analyzing, this research had found out that the illocutionary act of 24 Javanese proper names belong to four types of illocutionary act namely directives (8), commissives (5), expressives (5), and representatives (6). Names in Javanese society contain goals and ideals. The reason why the Javanese people used illocutionary in their Javanese proper name, because they want their live can be happy, successful and as beautiful as the names.

#### **5.2 Suggestion**

This research is not perfect which means it has a lot of mistakes. To make it better, another researcher can develop the study of Javanese proper name with different aspect to be analyzed. It is not only in term of speech act perspective but also semantics and syntactic point of view.
