

CHAPTER V

CONCLUSION

The title of the research is The Registers Used by Midwives in Puskesmas Babat Kumpul. Further, this research is about language variety, in this case is registers which are used by Midwives in Puskesmas Babat Kumpul. After analyzing the data, the researcher will be concluding in this chapter. There are three points that concluded as the conclusion below based on the statements of the problems in the previous chapter.

Based on the first statement, the registers used by Midwives in Puskesmas Babat Kumpul are Gravida, Pap, Extremitas, Odem in the first dialogue Anc. Djj, palpasi, albumin. Hpl. The next dialogue, it is found, there are implant, cyclofum ,Akdr. Informed consent registers. They are .Then, in dialogue three the registers are anamnesi, Ttv, Tfu,Pap, Vt, Effisement,kepala hodge 1, dialog four Uk, Djj, Letsung, knee chest, usg and the last dialogue it is found Bb and Td.

The second statement of the problems, the midwives use the registers in kinds of context such as prenatal care, installation contraceptive, labor, result check up, and complaint by patient. Thus, based on those contexts, it can be concluded that they mostly use those registers in medical context, especially in midwifery context.

The last, based on field of study from interview with midwives , the researcher have found the reason why midwives using registers are:

1. to protect patients from worry over their condition. at the time of the examination

conducted midwives found that there had been poor condition of the fetus. The midwives using registers.

2. abbreviation. This stands for a specific language or words used by midwives who are their medical language in obstetrics. other than that to expedite the review process, and it became a habit of midwives and if they use register words it is practice because they understand each other and if all thing in communication in common language so will needed a long time.

3. To keep secret among people of the same profession. In medical words a few ethnic code that not all the matter patient happened can is knowing direct to patient. Those matter in action remember for keep patient psychologist condition. Because of that , the midwives that our subject use registers words in their conversation with the same midwives when they are in the front of their patients to keep secret and make them be relaxed. It can help medical process.
