

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1 Conclusion

This research has purposed to find out whether or not there is correlation between students' mastery of past tense and their achievement in writing narrative text. Based on data is obtained, the result of this research as follows: The average score of past tense is 69.33.7 students acquired very good, 10 students acquired good, 5 students acquired fair, 2 students acquired poor, and 6 students acquired very poor; The average score of writing narrative text is 77,33. 2 students acquired excellent, 12 students acquired very good, 10 students acquired good, 4 students acquired poor, and 2 students acquired very poor. In this research proved that there is a positive correlation between students' mastery of past tense and their achievement in writing narrative text. Other words, to create the correlation between students mastery of past tense and writing narrative text, it is also supported by the assessing of writing and how organize both test between past tense test and writing test well, so that the effectiveness of tests create a substantial research or 0,797. This means that  $r$  value is higher than  $r$  table. Thus  $X$  values and  $Y$  values were correlated each other or  $H_1 = XY = \emptyset$ .

#### 5.2 Suggestions

In this research, the result is achieved well; therefore there are some suggestions to enhance the students' capability in writing narrative text which is maintained with good past tense score. The suggestions are the students

must study hard to enhance their capability in past tense because it interferences their writing narrative text. It is necessary for teachers and also the researcher as a teacher to know the factors that interfered students' writing narrative text. On the other hand, teachers must give occasion to the students to express their ideas in writing by considering their moody, their health, their assumption in learning English, their practice writing and their motivation for learning writing. Therefore further research, researcher has to conduct this research that has planed well and considering those factors should be considered.
