ACKNOWLEDGE

First of all, I would like to express my two grateful feelings. The first is to Allah SWT that gives me his slight vigor to finish my research whatever the obstacles. I believe that if it is not because of his power, I swear I could not do all things as the best I can beside my ambition. My second grateful is having great parents that all times supports me to burn my spirit that I must give them the best result in my study. Unforgettable to my brother and little sister that actually they do not help me anything but they show me the support with sweet care.

In this section, I would like to say big thank you to my two advisors. They are Miss Linda Mayasari S. Pd. and Mr. Sulton S. Pd. That guides me in every side of my research as patiently. Thank you again for continuing supporting me, motivating me and sharing your knowledge. I never forget my best advisors that guide me because this research is one of special things in my life.

My sincere thank you also goes to special people that same fight with me to make our dream come true. Thank you for someone that always beside, behind, and in front of me. I swear to you to make my name become long name with my title like your wish from me. Besides that, I would like to say thank you to BMTL crew. They also exist when I need and always give me stronger motivation. Thanks to show me how to relax when we are in the pressure to finish this research.

The last but not least, I would like to say thank you also to all my friends from same semester that together fight with me for your helps about my research or other friends from different major that always gives me motivation to finish this research as quickly as possible. I proudly present my research for all people that I mention. I hope that you all proud of me as your daughter, sister and best friend.

This research can be used in education field to revise the old style in learning process. The wish is the ravishment in learning process especially in teaching reading can make the student motivation to be more develop.
