

CHAPTER V

CONCLUSSION AND SUGGESTION

This chapter discussed about the conclusion and suggestion. Based on the result that was discussed in the previous chapter, the researcher explains about the conclusion of the effect using YouTube as media to teach listening on factual report. Whereas, the last section to give suggestions English teachers who teach in the same level of students and for the next researcher who wants to take this study as the further research.

5.1 Conclusion

From the result of the study in chapter IV, the researcher gets a conclusion that there is significance on the students' listening in pretest and posttest. Besides, the using YouTube is effective in teaching listening, that is proved by the significance in the students' listening scores after calculating the posttest score by using t-test. The scores of the students in the posttest are higher than in the pretest. Here are the result:

5.1.1 first, it was proved from the calculation of test such as pretest and posttest, it showed that H_0 is rejected and H_1 is accepted, so the YouTube as media is effective in teaching listening skill. The result both of test was shown different, it showed that the researcher done some calculation. The test used T-test with SPSS 17, the result was $P\text{value } 0,00 < \alpha 0,05$.

5.1.2 Second, it can be seen from pretest students' average score 53% increased to 81% in posttest. Furthermore, there were 18 students or 75% from 24 students got the passing grades

5.1.3 The third was the students response that seen from the questionnaire, the students were given positive responses for YouTube as media to teach listening in factual report.

5.2 Suggestion

Based on the above conclusions, the researcher wanted to give a suggestion. that could be applied in teaching and learning process of YouTube as media to teach listening on factual report, which hopefully would be applied for English teacher, students, and for other researcher.

5.2.1 For Teacher

For teachers and prospective teachers can make the effectiveness of YouTube as media to teach listening on factual report as one effort in made students enthusiastic and improve student learning outcomes.

5.2.2 For Students

The researcher gives some suggestion for the students to review the lesson at home and watch the YouTube in education channel until they mastery English, because there are a lot of video YouTube that can be watch at home for listening daily exercise. Students should active to follow the material during teaching and learning process. And the last students have to practice English every day and study hard.

5.2.3 For Other Researcher

This research can be contributed to research in the field of education is to determine the effectiveness of YouTube as media to teach listening on factual reports. this research can be a relevant prior study that can be used for other research to conduct other research on teaching other language skills using YouTube.
