B. Question 31 through 35 are based on the following passage

The stone age was a period of history which began in approximately 2 million B.C. and lasted until 3000 B.C.. Its name was derived from the stone tools and weapons that modern scientists found. This period was divided into the Paleolithic, Mesolithic, and Neolithic Ages. During the first period (2 million to 8000 B.C.), the first hatchet and use of fire for heating and cooking were developed. As a result of the Ice Age, which evolved about 1 million years into the Paleolithic Age, people were forced to seek shelter in caves, wear clothing, and develop new tools.

During the Mesolithic Age (8000 to 600 B.C.), people made crude pottery and the first fish hooks, took dogs hunting, and developed the bow and arrow, which were used until the fourteenth century A.D.

The Neolithic Age (6000 to 3000 B.C.) saw humankind domesticating sheep, goats, pigs, and cattle, being less nomadic than in previous eras, establishing permanent settlements, and creating governments.

Global Warming

Is it an end to our world?

Global warming is a phenomenon used to describe the gradual increase in the temperature of Earth's atmosphere and oceans. Global warming is not a new problem but lately people are acknowledging that we are facing a serious problem. Climate change is apparent everywhere. Failed crops, economic slowdown, and deforestation are among the several impacts of global warming.

First of all, there is irrefutable evidence that human activities have changed the atmosphere of our earth. Since the time we have been industrializing, we started polluting our waters and air, and have been releasing greenhouse gases that contribute to global warming.

Secondly, according to research by the Greenpeace organization, there is evidence of extensive deforestation being carried out in Indonesia and other tropical countries around the world. These forests are used to grow crops like palm sugar, palm oil and coffee—the lifeline of Western society (Green-peace report, 2007). The impact of climate change is noticeable throughout Asia-Pacific, either during hot days or too much rain accompanied by wind and thunderstorm. This has started to affect the economy as well.

Picture 4.1 Effect of global warming (Source: nationalgeographic.com)

Furthermore, the shifting weather patterns have made it difficult for farmers to grow crops. A recent study has shown that due to unpredictable weather patterns, there have been lot of failed crops (Reuters, 2007).

In conclusion, global warming is not a new problem nor are we solely responsible for it. But as the citizens of the world, we have to take every possible action to help overcome this issue. It is not only for us but for all the future generations to follow.

Discussion

1. What is global warming?
2. Is it a severe problem? Why?

Building Blocks

Analytical Exposition Text

An analytical exposition text evaluates a topic critically but focuses only on one side of an argument.

In your life if you have tried to persuade anyone on a certain issue or argued relentlessly about something with someone, then you have used an exposition.

The argument and point of view have to be supported by facts and relevant information. The thesis statement has to be reiterated in the conclusion.

Social Function

The purpose of an exposition text is to persuade your audience to look at an issue with your perspective.

Legal Defenses

Speeches/Lectures

Editorials

Letters

Examples of
exposition texts are

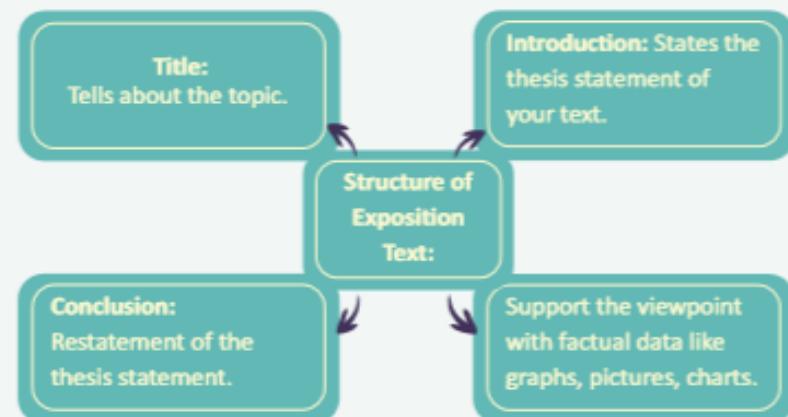

Newspaper Articles

Political Leaflets

Essays

An exposition text needs to:

- clearly state the point of view,
- use valid research findings to support your viewpoint,
- defend your viewpoint,
- support the viewpoint with factual data like graphs, pictures, charts.

Title:

- Tells about the topic of the essay.

Introduction:

- This is the starting point of an exposition essay.
- Here you state the topic and establish the point of view (thesis statement).
- Introductory statement should be an emotional statement or a question that is an attention grabber.
- A preview of the points you plan to make to support your thesis (argument).

Body:

- A series of arguments to convince the audience.
- Each paragraph starts with a new argument.
- Each paragraph has a main point, reason for the main point and evidence to support the main point.

Activate Windows
Go to PC settings to activ

- Use of emotive words, mental verbs, causal conjunctions to persuade the audience.
- Each paragraph has to be logically linked to the previous paragraph and to the thesis statement.

Conclusion:

- Reiterates or restates the thesis statement.
- Summarizes what has been stated.

(Emilia, 2012)

Language Features of an Exposition Text:

Use descriptive persuasive words with emotive connotations to emphasize your viewpoint. These words can either be positive or negative. **Use thesaurus to find an appropriate word.** For example:

- Instead of using "bad", **USE** appalling, unfavorable, ghastly, terrible;
- Instead of using "good", **USE** fantastic, incredible, momentous, remarkable;
- Instead of using "persuading", **USE** convincing, urging, enticing, realistic;
- Instead of using "persuasive", **USE** credible, realistic, rational, sane, coherent.

Use the present tense such as *lions live; I eat; cheetahs run*.

Use mental verbs such as *I believe; I prefer; I agree; I doubt; I disagree*.

Use saying verbs to support the argument such as *people say; it is said; research indicates*, etc.

Use connecting words to link to arguments so that the flow of the arguments is logical and fluent.

Some examples are:

additionally, furthermore, not only, also, in addition, moreover, likewise, firstly, secondly, etc.

Use causal conjunctions to indicate a cause or reason of what is being stated.

For example:

because, consequently, despite, due to, for that reason, in that case, eventhough, yet, otherwise, etc.

Use words that express the author's attitude - to qualify or confirm.

For example:

will, frequently, may, must, usually, typically, habitually, commonly, doubtless, characteristically, in all probability, etc.

Use persuasive techniques:

- Use generalizations to support viewpoints or arguments. Generalizations are common beliefs, general statements.
- Use evidence and facts to back up the generalizations like using research, expert opinions, testimonies or quotes.
- Use exaggerations to make things or issues appear better or worse than they actually are.

(Simon & Schuster, 2002)

Example of an exposition text

Text Organization	Banning of motorbikes is necessary in housing areas.	Language Features
Introduction (Thesis statement)	Motorbikes are a nuisance and a cause for great distress. Even though motorbikes are considered as the most convenient form of transportation, I think they are a hazard to humans, animals as well as the environment. I think motorbikes should be banned in housing areas due to the following reasons: cause of unreasonable amount of noise, air pollution, diseases, and accidents.	Mental verbs I think I believe
Argument 1 + elaboration	First of all, I would like to point out that motorbikes are a major contributor to the pollution in the world. Research has shown that motorbikes emit a deadly gas that is dangerous for the environment. Consequently, long-term emission of gas from motorbikes is a major contributor of global warming (Science Daily).	Conjunctive relations First of all Secondly Causal conjunctions Consequently
Argument 2 + elaboration	Secondly, according to a report from BBC News Channel, motorbikes are also responsible for causing diseases such as bronchitis, cancer and are a major trigger	Generic reference Accidents

	of asthma and high blood pressure. Some of the diseases are so ghastly that they can kill people (BBC News, 2009).	
Argument 3 + elaboration	Furthermore , motorbikes create so much noise. There is "vroom vroom" noise everywhere. It is extremely difficult to sleep. Parents with infants find it extremely challenging . The moment their babies fall asleep, one or another motorbike passes by and the baby wakes up. It is also arduous for children to concentrate on their homework. Experts are of the opinion that if there is extreme noise, it can lead to deafness and lack of concentration in children and adults (Fields, 1993).	Children Parents Expert opinion Expert Research show
Argument 4 + elaboration	Finally , motorbikes are responsible for horrible accidents . In some cases, there are deaths. Motorbike riders go so fast that they are unable to stop on time thus they end up hitting other people or animals. Many times a lot of animals are trampled and found dead on the road. Motorbikes are known to be the biggest killers on the road (Fields, 1993).	Present tense Are responsible Go so fast Are known
Conclusion (Reiteration of thesis statement)	In conclusion , from the arguments above, I strongly believe that motorbikes should be banned from housing areas.

Active Conversation

Choose one of the topics given below.

- A. Passive smoking is a silent killer.
- B. Why is learning English important?

State your arguments or position on one of the above given issues and then discuss with your partner. For the arguments, you can use some expressions like these:

- I would like to remind you
- It is important for us to
- I believe that
- I am convinced that
- Let me tell you
- Try to remember

A. Passive smoking is a silent killer

You can use this example to start your conversation:

Let's Create/Contribute

Choose one of the activities given below.

1. You have been chosen as the project officer for showcasing an exciting wildlife art exhibition on the fauna and flora of Indonesia. The purpose of this wildlife showcase is to raise money to support conservation of nearly extinct animals in Indonesia. You have to write an exposition text on conservation of animals and use this exposition text as your speech for the opening of the event. You will also make posters to depict the plight of innocent creatures that are killed or captured by poachers.
2. Create a pamphlet or a movie to educate people in your school on "Dangers of drug abuse and cigarette smoking."

Make sure to put lots of pictures in your pamphlet.

B. Question 31 through 35 are based on the following passage

The stone age was a period of history which began in approximately 2 million B.C. and lasted until 3000 B.C.. Its name was derived from the stone tools and weapons that modern scientists found. This period was divided into the Paleolithic, Mesolithic, and Neolithic Ages. During the first period (2 million to 8000 B.C.), the first hatchet and use of fire for heating and cooking were developed. As a result of the Ice Age, which evolved about 1 million years into the Paleolithic Age, people were forced to seek shelter in caves, wear clothing, and develop new tools.

During the Mesolithic Age (8000 to 600 B.C.), people made crude pottery and the first fish hooks, took dogs hunting, and developed the bow and arrow, which were used until the fourteenth century A.D.

The Neolithic Age (6000 to 3000 B.C.) saw humankind domesticating sheep, goats, pigs, and cattle, becoming less nomadic than in previous eras, establishing permanent settlements, and creating governments.

The Jakarta Post - Sinabung not National Disaster, BNPPB says - The National Disaster Mitigation Agency (BNPPB) ^{emphasizes} emphasized that the Mount Sinabung's eruption in North Sumatra was a regional and national disaster.

BNPPB chief spokesman ^{spokesmen} Sutopo Purwo Nugroho said the Karo and North Sumatra regional administrations were still running normally and nothing had paralyzed ^{Paralysed} the regional administrations.

Despite almost 95 percent of the assistance being from the central government, this is not a national disaster, he told Antara news agency.

Even in the post-disaster ^{fee} phase, the central government will still be involved in rehabilitation and reconstruction.

Sutopo said the problem with the Mt. Sinabung eruption is the absence of a Regional Disaster Mitigation Agency (BPBD) in Karo regency.

Tsunami in Japan

Karen Tempat Nidhi
On March 11, 2011, a magnitude-9 earthquake shook northeastern Japan, unleashing a savage tsunami. The earthquake was centered on the seafloor 45 miles (72 kilometers) east of Tohoku, at a depth of 15 miles (24 km) below the surface. The shaking lasted about six minutes.

Residents of Tokyo received a minute of warning before the strong shaking hit the city, thanks to Japan's earthquake early warning system. The country's stringent seismic building codes and early warning system prevented many deaths from the earthquake, by stopping high-speed trains and factory assembly lines. People in Japan also received texted alerts of the earthquake and tsunami warnings on their cellphones.

Less than an hour after the earthquake, the first of many tsunami waves hit Japan's coastline. The tsunami waves reached run-up heights (how far the wave surges inland above sea level) of up to 128 feet (39 meters) at Miyako city and traveled inland as far as 6 miles (10 km) in Sendai. The tsunami flooded an estimated area of approximately 217 square miles (561 square kilometers) in Japan.

The tsunami caused a cooling system failure at the Fukushima Daiichi Nuclear Power Plant, which resulted in a level-7 nuclear meltdown and release of radioactive materials. The electrical power and backup generators were overwhelmed by the tsunami, and the plant lost its cooling capabilities. In July 2013, TEPCO, the Tokyo Electric Power Company, admitted that about 300 tons of radioactive water continues to leak from the plant every day into the Pacific Ocean.

L: Hai

D: Hallo .

L: Are you good ?

D: Yes , i'm good . and you ?

L: me ? i always good :v

D: oh ya , i know :v , But Japan is not good .

L: Japan ? why ?

D: the tsunami has hit Japan

L: oh my God . , i hope there aren't many victims

D: Yes i hope too .
