CHAPTER III

RESEARCH METHOD

This chapter describes how the researcher analyzed the research. The researcher briefly describes the research method that being used in order. This chapter also designed to help the reader to understand deeper on how the research had been done. Thus, this research remains clear and transparent for all readers.

3.1 Research Design

Research design is the basic plan on how a research will be processed. Kumar had explained about research design in his book titled *Research Methodology*, he said that, "a research design is written plan for a study. It communicates the intentions of the researcher, the purpose of the study and its importance, together with a step by step plan for conducting the problem" (2008:30). Thus, research design is one of the important things to be paid attention on.

Since the goal of this research is to discover phenomena that happened to certain character from a literary work, the researcher decides to use a qualitative research to analyze the data. Given stated in her book, "Qualitative approaches are typically used to explore new phenomena and to capture individual's thought, feelings, or interpretation of meaning…" (2008:xxix). The researcher examines the data carefully through each words in the novel, then capture the phenomenas that might appear in the literary work to support the research analysis.

3.2 The Source of the Data

Basically, the source of this research are collected from these two distinguished sources, they are;

3.2.1 The main data of this research is from the novel *Undercover Jihadi Bride* by Anna Erelle.

3.2.2   The supporting data comes from the experts' such as; R.W Connell, John Beynon, Michael Kimmel and etc..

3.3   Research Instrument

"A research instrument is what you use to collect information (data) to answer your research question. It applies to both qualitative and quantitative approaches. It can produce quantitative and/or qualitative data.", Eng Kok Tan (2013). The researcher will be the research instrument in this researcher. Thus, researcher hold an important position in this research to determine which part of the novel can be made as a compatible data based on the theory that the researcher chose in the beginning.

3.4   Data Collection Technique

The researcher collects the data by using several techniques which help the researcher to analyze the data. Those are;

3.4.1   Reading, the researcher reads and comprehends the contents of the novel Undercover Jihadi Bride by Anna Erelle.

3.4.2   Taking a note, the researcher collect the data by taking notes of words, sentences, dialogues and paragraphs which are contains aspect that has possibility to support your research.

3.4.3   Classifying, the researcher classify the data which has been collected, into several classes based on the focus of the data.

3.4.4   Interpreting data, in this step the researcher go deeper on the analysis between the main data which later supported by supporting data.

3.5   The Data Analysis

The data is collected from *Undercover Jihadi Bride* as the main data and also from other sources that related to this research's topic which has the possibility to support the research. After collecting the data the researcher analyzes the data by using the theory that had already been chosen by the researcher. The next is giving further explaination about the data that being displayed in order to make it easier for the reader to understand which is also

supported by theories from the expert. And the last but not least the researcher will make a conclusion in the end of the research to make the reader can fully get the focus of the research.
