

## CHAPTER V

### Conclusion and Suggestion

#### 5.1 Conclusion

Based on the result and discussion in previous chapter, it could be concluded that the use of social media “Instagram” in teaching writing recount text to improve students ability was effective. It was proved by obtained score of.

Then the conclusion, there is a significance differences in the achievement between students in class VIII B who were taught by using the “Instagram” and the students in class VIII A who were taught without social media “Instagram”. The average score of experimental class in post-test was 89,0 and the average score of control class in post-test was 60,0. It means that experimental class which VIII B was better than the control class which VIII A.

And the experimental class students are more interest and enthusiast in learning process because the teacher used the social media “Instagram” as learning media. After using social media “Instagram” as learning media, students can understand the explanation of recount text. They can make a short paragraph of recount text gramatically and arrange correctly.
