

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter consists of two parts, such as conclusion and suggestion. It can be seen as follows:

5.1 Conclusion

Based on the analysis data of the conversation between Medan and Javanese speakers in Surabaya. It obtains the answer from the three research questions. The first, There is a phenomenon of communication accommodation between Medan and Surabaya speakers. The second, Medan speaker accommodates Surabaya speaker through two strategies, they are convergence and divergence strategies. Convergence strategy is an individual strategy to adjust his speech when Medan speaker accommodates Surabaya speaker. It can be seen in the words “*wes tetep*” (already permanent).

Whereas divergence strategy is the different accent and non verbal behavior between Medan and Surabaya speakers. It can be seen in the words “*terrrr*” (terrrr) and “*aa*” (aa). Based on the analysis data, it is known that Medan speaker has tendency of lowering intonation when he communicates with Surabaya speaker. That phenomenon is one of the effort to adjust Surabaya speaker through convergence strategy. The third, Based on the analysis data, it is found the reason Medan speaker accommodates Surabaya speaker to get the approval process which purposes to show the solidarity between Medan and Javanese speakers in Surabaya.

5.2 Suggestion

This study discusses the phenomena of accommodation communication through Medan speaker and Javanese speaker. The researcher hopes that this study could give knowledge to immigrant to interact with the society comfortably

and also give the reference for the readers who want to explore this study deeply. As native Medan person, the researcher also gets new experience about how to accommodate the people well and how to manage misunderstanding towards the interlocutors. the researcher hopes, this study could give contribution in Sociolinguistics especially in communication accommodation.
