CHAPTER 3

METHODE OF THE RESEARCH

This chapter provides the description of some steps in doing the analysis which is used. This research method is arranged based on the problem analyzed and the main purpose of the research. In this chapter presents the methodology of collecting and processing the data. It is include the research design, source of data, research instrument, data collection technique and data analysis technique.

3.1 Research Design

The research design of this study is descriptive qualitative method to find out how people feel or what they think about a particular subject or institution. Qualitative research is especially important in the behavior sciences where the aim is to discover the underlying motives of human behavior (Kothari, 1990:3). The research is conducted by qualitative approach because the result of the data analyzed is in descriptive phenomenon such as words, sentence and utterance.

This research refers to the procedure of collecting data, classifying, identifying, analyzing and describing data. The main data of this research is taken from the dialogue in one of talk show on TV One that is *Indonesia Lawyers Club* .This metode used in *Indonesia Lawyers Club* to get objective description and appear the real condition of code switching and code mixing used in *Indonesia Lawyers Club*, especially episode on April and May 2012.

3.2 Source of Data

The source of data in this study is taken from the dialogue of the lawyers or guests who attend in *Indonesia Lawyers Club*. The data is taken especially in episode on April and May 2012. The source of data had already been prepared to support this research.

3.3 Data Collection Technique

The research data were taken from talk show on TV One that is Indonesia Lawyers Club. This research describes the list of code switching and code mixing that found in the dialogue of Indonesia Lawyers Club. In collecting the data, this research has some of techniques to collect the data, such as: recording, collecting, listening for several times and keeping notes. The first the object of the study is recorded. After that collect the result of the recorded and then were listened for several times. Then the dialogue of the recording is written to be taken as the data which is needed. Finally, the data collection is described based on the form of code switching and code mixing. It is also described the context of the usage code switching and code mixing. The last the data collection is used to find the possible reasons why the lawyers of the *Indonesia Lawyers Club* switch and mix their language.

3.4. Data Analysis Technique

After collecting the data, the data is analyzed by some steps. The following below are some of the data analysis technique:

3.4.1   The data was prepared to be analyzed.

3.4.2 The data were classified to the form of code switching and code mixing and the data were type according to their categories by using code switching and code mixing table.

3.4.3 After the data had been finished were classified, the data will be analyzed and were described according to the theories that being used.

3.4.4 After all of the data finished were classified, the result of the analysis will be presented in chapter four as data analysis and finding.

From the explanation above this research was done based on some steps. The research of this study use descriptive qualitative method. This research refers to the procedure of collecting data, classifying, identifying, analyzing and describing data.

The table can be seen bellow.

Table of code switching and code mixing

No	Fragment	CS		CM					
		S	M	W	P	H	WR	I	C
	TOTAL								

Note:

(CS) Code Switching, (S) Situational, (M) Metaphorical

(CM) Code Mixing, (W) Word, (H) Hybrid, (P) Phrase, (WR) Word

Reduplication, (I) Idiom, (C)   Clause.
