

CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

This research uses a qualitative method with the purpose to know how the implementation of Blogger in teaching writing descriptive text and students' responses toward the use of Blogger at MTs Muhammadiyah 03 Sedayulawas.

In implementing Blogger, the teacher applies it well from beginning to end and students understand how to use this application and the teacher also explained the interesting features in Blogger. Therefore, the students were very enthusiastic when writing descriptive text using Blogger because their writing looked interesting.

In addition, the students' responses showed a very positive category with an average score percentage of 83,25%. From these results, it shows that students are very interested in using Blogger in teaching writing descriptive text and can be a medium that can help students understand and make descriptive text.

5.2. Suggestion

The researcher provides suggestions that can be considered for the teachers and future researchers.

5.2.1. For teachers

Researchers hope that teachers can use other learning media so that can increase student interest, especially in learning writing descriptive text.

5.2.2. For future researchers

The researcher hopes that future researchers can conduct this type of research using other media that are fun and able to increase students' interest in learning English.
