“Impact Profitability, Liquidity, and Credit Risk to Market Capitalization Banking Sector on the Indonesia Stock Exchange” Masrurotus Sa’adah1, Didin Fatihudin2, Anita Roosmawarni3 Manajement Departement Faculty of Economics and Business Muhammadyah University Surabaya ABSTRACT
“Thisstudy aims to test and analyze impact profitability, liquidity, and credit risk on market capitalization of the banking sub-sectors listed on the Indonesia Stock Exchange from 2009-2018. This research method used panel data regression analysis. The sampling method of this research used a purposive sampling technique.

The F-test results showed that all variables simultaneously had a significant effect on market capitalization with a significance value of 0.0%. The test results with the t test show that profitability has significant positive impact on market capitalization with a significance level of 0.0%. In contrast, other variables, namely liquidity and credit risk, had an insignificant effect.” INTRODUCTION “Banks have
