ABSTRACT

Revealing of interlanguage caseson English Folktales in English Reading Texts in Internet Blogs.

Learning English becomes more and more important nowadays since we know that English is one of the international languages which can be used to communicate around the world. In Indonesia, English is learnt as a foreign language. Learning a different language is sometimes difficult since the target language has different elements compared to the native language. These differences sometimes cause Indonesian to employ interlanguage when using it. This final project primarily deals with Revealing of Interlanguagecaseson English Folktales in English Reading Texts in Internet Blogs. It describes the Interlanguage cases on English reading texts made by the Indonesian blogger.I use the qualitative-descriptive approach of which the data were obtained from the blog writer, writingtext in the English book junior high school or *BSE (BukusekolahElektronik)*. These writings were then analyzed. The interlanguage cases were classified into five groups. They were in syntax aspects, lexical aspects, Morphological aspects, verb aspects, sociolinguistic element.

From the result in chapter IV I can conclude that the Indonesian bloggers made interlanguage onsyntax aspects, lexical aspects, Morphological aspects, verb aspects, sociolinguistic elements. From the result I can conclude that the possible causes of interlanguage are overgeneralization, and interference. It is suggested that the Indonesian blogger need more practices dealing with verb forms since they were the basic knowledge needed for telling their past experiences.

Key word: Interlanguage, Second Language Equation,Error Analysis, English writing.
