MOTTO:

The most beautiful thing we can experience is the mysterious. It is the source of all art and science.

By: Albert Einstein

Dedicated:

*My dedicated this thesis to:
My Parent, my sisters, brother, and my sweet heart.*

ACKNOWLEDGEMENTS

First and foremost I would like to say thankfulness to ALLAH SWT , Subhanallahu Wata'ala The Almighty Who gives me all His blessing and becomes my power to finish my thesis.

Secondly I would like to sent greetings sholawat to the Prophet, Muhammad, SAW. The last Prophet Who becomes the leader of Moslem and the greatest Leader of Islamic ummah.

Thirdly it is desirable to express gratitude to several persons who help me in the process of writing this thesis, of which the following persons are worth mentioning here:

1. Drs. Djoko Soeloeh Marhaen, M.A and Drs Wijayadi, M.Pd who have patiently guided me and for the suggestion, without which this thesis have not have been able to reach its present shape.
2. All of my teachers who have provided their guidance
3. My beloved parents, father and mother who have given her support to finish this thesis.
4. To my sister and brother who have given support to finish this thesis.
5. My sweetheart who have given support to finish this thesis.
6. Health analyst particular profession who have helped to get data.

7. All of my friends Kip Eicy who have given their support to finish of this research.

Finally, the researcher hopes this thesis could be useful and knowledgeable especially for the readers and the writer.

The writer:

Ratna P.I.M

ABSTRACT

Maghfiroh, Ratna Putri, I. 2013. *Registers Used By Health Analysts*. Skripsi, English Department Teaching Training and Education University of Muhammadiyah Surabaya. 1st advisor: Drs. Djoko Soeloeh Marhaen, M.A., 2nd advisor: Drs. Wijayadi, M.Pd.

This study is a sociolinguistics study. About registers Holmes (1992:276) states, “the language of groups of people with common interest or jobs, or the language used in situations associated with such groups”. This is to say that the word used by groups to interact with others have a purpose in work. Based on the definition above profession registers, the registers phenomena often occur in society, one of them is registers used by health analysts. This study is limited to register used by health analysts in test result of disease.

A descriptive qualitative method is used in this study since the data being analyzed are the problem of what is registers used by health analysts. In general, the data of the study can be divided into two groups, which are: the main data, and the additional data. The data collection is from interviews, and test result the disease of laboratory.

To collect the data writer to list the data of word register used by health analysts in test result of disease, The analysis of the abbreviation registers, registers of hematologic examination, Stands for the value/size/unit of Laboratory test Results.

There are some kinds of registers used by health analysts 1, used of abbreviation, 2, used of stand for the value/size/unit in laboratory test result, 3, describe what those registers mean from the point view of laymen’s vocabulary. analyzing data of test result from Al-Irsyad hospital, Islamic hospital, and Dr. Soetomo hospital Surabaya. The analyzed data laboratory result including, from full blood examination laboratory test, clinical chemistry laboratory tests, renal physiology laboratory tests, and complete urine laboratory test.

Keyword: sociolinguistics, registers, health analysts. The abbreviation, the stands for the value/size/unit laboratory test, mean from the point of view laymen vocabulary.
